

EvoCoating VEHICLE TECHNOLOGY

MADE IN GERMANY

► The Company

WORLDWIDE ACCLAIM, MADE IN GERMANY

Founded in 1952, Lankwitzer has established itself worldwide as a premium supplier of industrial coating systems. Lankwitzer's trademarks are top – class quality made in Germany, a high degree of flexibility, outstanding innovative strength and a customer – driven mindset. The key to our success is global availability of all our products and ongoing customer support provided by a highly – qualified team of developers and technicians.

The highest level of professionalism and a passion for our products ensure that we are a reliable partner for customers around the world as well as a leading manufacturer of cutting edge coating systems in the ACE (agricultural, construction and earth – moving equipment), railway, pipe, automotive and plastic packaging sectors.

As an owner – managed family enterprise, we operate independently, quickly, without hierarchical barriers – and take personal responsibility for our promises.

COATING SOLUTIONS FOR VEHICLE TECHNOLOGY

Every year, many millions of vehicles are produced worldwide for the use on and off the road. For every vehicle, in every country, the challenge is always the same: Power must be transferred from the engine to the wheels as efficiently, economically and reliably as possible.

Numerous manufacturers of vehicle components rely on Lankwitzer expertise to solve these challenging and complex tasks. We supply high-quality coatings for powertrain technology, axles and other transmission components for both passenger cars and commercial vehicles.

LANKWITZER provides sustainable and high quality coating systems with outstanding properties:

- Fulfilment of all standard specifications of OEM manufacturers
- Water-soluble, solvent-based and radiation-curing paint systems (high solids content), VOC-compliant
- Fastest drying for optimized production processes: Packaging and transportation directly after the coating is possible
- Close cooperation with plant manufacturers for the optimization of all application methods (conventional spraying, high rotation, etc.)
- Engineering services from a single source

Our partners in the automotive industry:

Headlights | HELLA

Drive Flanges | **elso**

Engines | **rexroth**

Axis | **DAIMLER**

Engines | LUK

Injection Pumps | **BOSCH**

Brake Systems | MAGNET MARELLI brembo FEDERAL MOGUL

Wheels | MICHELIN Continental

Airbags | **elso**

BOSCH | Wipers

BMW | Battery Cells

KEIPER | Seat Adjustments

BWI IT für Deutschland | Shock Absorber

BOSCH | Starter

ZF THK | Steering Systems

HAHN GASFEDERN | Gas Springs

HASSE & WREDE | Vibration Absorber

► Highlights

PROJECT EXAMPLES

Electromobility ►

- Battery cell coating
- Electrical insulation
- With simultaneous heat dissipation painting process in the production line
- Drying within seconds
- Immediate subsequent processing of the cells
- VOC-free
- 97 % efficiency through recycling of the overspray

Headlights ►

- Primer for metallization of reflectors
- 100 % UV varnish
- Perfect surface refinement for maximum light yield

Chassis and components ►

- Compliance with all OEM specifications
- Full range of high-quality coating systems:
 - Conventional
 - Hydro
 - UV
- Single-layer solutions with rapid ovenless drying

Brake Technology ►

- Coating of brake components such as
 - Brake discs
 - Brake glues
 - Green friction paint
- with high-performance coatings:
 - UV varnish
 - Hydro paint
 - Zinc dust paint
 - Conventional

Windscreen wiper blades ►

- The uncompromising solution for your premium products
- Hydro-graphure for wiper blades
- VOC-free
- Non-marking

We have a large number of locations worldwide that stand out due to their infrastructure and the high technical standard of our service and sales teams. Direct networking between the employees of all our subsidiaries drives forward our developments and ensures fast order processing. Our company's success is built on these firm foundations.
